Superior signal integrity. Industry's lowest noise floor delivers more stable, accurate and repeatable measurements for all high-speed digital and RF designs.

Deep application analysis. Industry-exclusive 1Gpts of memory and combined hardware/software triggering allows for quick capture of complicated signals and infrequent events for the most effective compliance and debugging.

Low Noise. Industry's lowest noise floor provides you the maximum design margin.

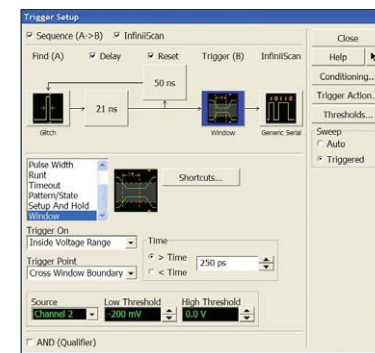

1 Gpts. Industry leading MegaZoom ultra deep, ultra responsive memory captures up to 25 ms of data at 40 GSa/s.

Advanced triggering. Industry's only three-level sequence triggering provides you the maximum triggering flexibility.

12.1 inch. Large XGA display provides maximum visibility into the scope's analysis.

22 MSa/s. Industry leading data transfer rate assures you a quick data transfer from the scope to your PC/server.

Applications. Industry's widest selection of applications. Application server license solution lets you share licenses across Infiniium scopes.

The InfiniScan Plus trigger system provides the industry's only 3-level sequence trigger.

Acquiring 25 ms of data at 40 GSa/s using 1 Gpts of memory provides the highest chance of capturing your signal of interest.

The ultra-low noise floor shows the true performance of your device under test.
